

## Design System & Examples

Software: Developed by International Company and customly tailored for SGB-Cape Scaffolding Systems-incorporating SGB-Cape scaffolding products and Autocad software as the driving engine.

Features:

- Once a plan is drawn and choices selected from the standard scaffold lengths, widths and heights, Iscaf automatically scaffolds the required areas.
- The scaffold can be modified to suite the desired requirements (as allowed by the parameters).
- It further generates a 3-D model, which can be viewed at different
- A quantity list can be prepared for any stage or area of scaffold.
- A quotation can be prepared with choices from estimate, sales or hire rates
- The quotation also automatically calculates the mass of the scaffolding.
